1. The essential terms of a standard wind lease grant the wind company the right to install wind turbines, cables, roads, and other facilities on the property and the right to operate such facilities for a period of 20 years or more. In exchange the landowner is paid an annual fee based on the number of turbines installed on or near the property. Compensation depends on number of turbines on the property, lengths of cables, and other configuration details to be evaluated during Article 10 application review.
2. Unless noted otherwise, all agreements are in place as of the date of this table.
